

roger.strand@uib.no

→ Why do WE have a course in (nano-)ethics
whereas other M.Sc. students don't??

1) Nano is new - new risks - precautionary measures - novel properties

2) "The others perhaps should have had it" - new opportunities

3) Nano as fast-growing, ^{huge potential} impact on society
disruptive, key enabling society

4) The opportunity to have the ethics BEFORE.

5) Why don't they? Gradual change - Frog in the water boiler

Some areas might be more
prone to ethical challenges

- nanomedicine
- nanobio
- nano-inf
- tox
